APPLE  
WRITER  
II

Compatible With

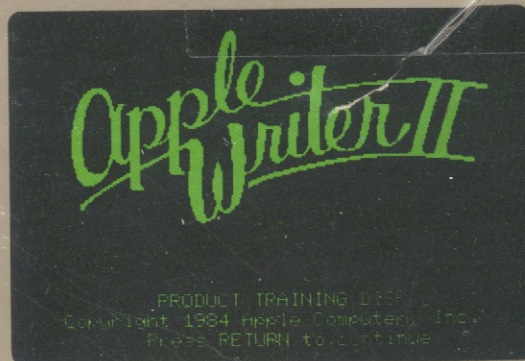

***Apple Writer II, version 2.0, turns your Apple IIc or Apple IIe computer system into a sophisticated, easy-to-operate word processor.***

# The Apple II

## ***With Apple Writer II you can:***

- quickly add, delete, move, and copy words, sentences – even whole paragraphs.
- use formatting features such as underlining, centering, tabs, headers, and footers.
- use the built-in Word Processing Language to automate repetitive routines such as form letters.
- create your own special-purpose “function keys” to automatically retrieve the features you use most.
- gain access to popular information services by using the built-in communications function.

## ***System Requirements:***

- Apple IIc; or Apple IIe with disk drive
- monitor; or video display

## ***Recommended:***

- Imagewriter or other compatible printer
- second disk drive
- Apple Modem
- extended 80-column text card (for Apple IIe)

***Apple Writer II***  
*Version 2.0 (ProDOS based)*

	[X] (with direction arrow →)	Retrieves paragraph.
	[O] E	Deletes file from disk.
	[D]	Changes direction from < to > and vice versa on the data line.
	[F] /word/ [F] /word/new word/ [F] /word/new word/A [F] =	Finds <i>word</i> . Finds <i>word</i> , replaces with <i>new word</i> . Replaces all <i>words</i> with <i>new words</i> . Resumes previous find command.
Find and Replace	[G] character [G] ? [G] *	Gets definition represented by character. Sets definition. Purges all definitions.
	[Q] E [Q] F	Loads glossary from file. Saves glossary in file.
	[G]-?	Displays Help Screen Menu.
	Just start typing.	
	[O] F	Lists names of volumes on-line.
Glossary	[L] filename [L] =	Loads document from named file. Loads document named on data line.
	[L] file!marker!marker! [L] file!!!last marker! [L] file!first marker!	Loads part of document. Loads from beginning to marker. Loads from marker to end.
	[L] file!marker!marker!A [L] file!marker!marker!N	Loads <i>all</i> parts automatically. Loads parts without markers.
	[L] # [L] filename\	Loads from memory. Allows you to peek at a document.
	[O] C	Locks file; prevents accidental deletion.
Help	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
Insert	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
List Volumes	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
Load	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
Lock file	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
Page Number, Line Count	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.
	[O] C	Locks file; prevents accidental deletion.

<b>Print Commands Menu</b>	[P] ?	Displays menu; accesses commands.
<b>Print Values</b>	[Q] C [Q] D	Loads print value file. Saves print value file.
		(See also "Printing and Formatting" at end of card.)
<b>Print Commands</b>	[P]	Accesses print and format commands.
		(See also "Printing and Formatting" at end of card.)
<b>ProDOS Commands Menu</b>	[O]	Displays menu; accesses commands.
