OUT OF THIS WORLD™

Get Ready For The Next Generation Of Action/Adventure Games.

You're about to enter a new world of computer entertainment. *Out Of This World*™ bridges the gap between Cinema and Action/Adventure games with a completely new style of fluid, cinematic storytelling.

Hurtled through space and time by a nuclear experiment gone wrong, you'll need to dodge, outwit, and overcome the host of alien monsters and deadly earthquakes that plague the alien landscape you now call home. Only a perfect blend of logic and skill will get you past the deadly obstacles that lie in wait.

Over two years in development, *Out Of This World's*™ state of the art, polygonal graphics system generates real-time, rotoscoped animation in a fluid system of cinematic zooms, pans, close-ups, and scaling. The same cutting-edge technology that lies at the heart of today's best flight simulators allows *Out Of This World*™ to totally involve you in its intriguing, real-time story of interdimensional travel.

- Cinematically styled, rotoscoped animation
- State of the art, real-time, polygonal graphics
- A continual audio mix of digitized sound effects and musical score
- VGA graphics
- Supports most major sound boards
- Keyboard/joystick controlled
- An action/adventure that actually tells a story
